Air conditioning support and profile kit

Kit composition:

- Profile for fixing the air conditioning supports, 790 mm length x 1,5mm thickness, which facilitates the positioning and levelling of the equipment.
- Set of air conditioning supports of 1,5mm thickness.
- 1 set of fixing screws for supports and profile.
- 1 set of silentblocks and screw with rubber stop for subsequent adjustment.
- 1 level bubble
- MARTIGRAP printed on the support

Covering:

The entire kit is coated with Ral 9002 grey polyester epoxy paint.

Maximum load

The maximum recommended load is 150 kg.

Applications:

Especially suitable for the installation of air conditioning condensing units.

Advantages:

It allows levelling and regulation of the outdoor unit.
