

ATMOS PELLET TANKS

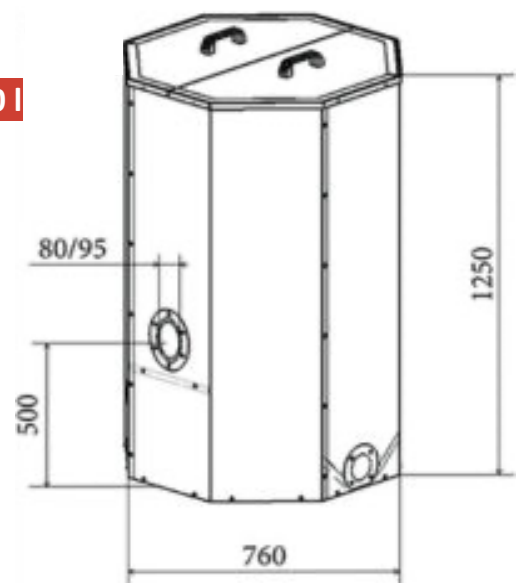

The tanks serve pellet hopper automatic pellet boilers. They allow you to very much change the location in the boiler room and, last but not least, increase the comfort of the boiler operator

250 l

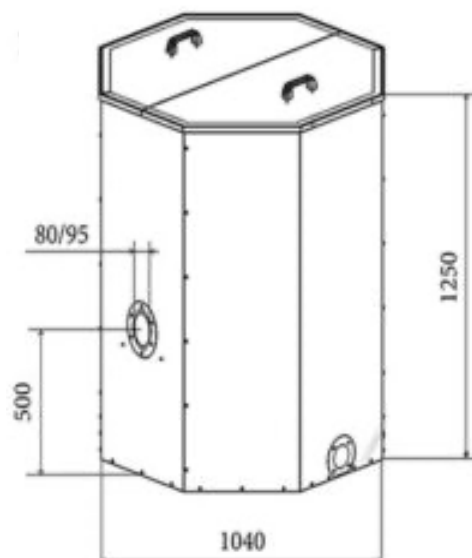

This is the **smallest** size (code: H0204)
In the case of a small boiler room, when a larger volume of the pellet tank cannot be used.
163 kg **of pellets** are stored in this tank, i.e. about 730 kWh.
This one is ideal for use in boilers up to **25 kW**.

500 l

This is **medium** size (code: H0201)
In the case of a small boiler room, when we can not use a larger volume of the pellet tank.
This tank stores **325 kg** of pellets, i.e. about 1463 kWh.
This one is ideal for use in boilers up to **40 kW**.

1000 l

This is the **largest** size (code: H0047)
In this tank, **650 kg** of pellets are stored , i.e. about 2925 kWh. This is ideal for use in boilers up to **80 kW**.
